

Market Size and Statistics

The original ASEAN+3 Bond Market Guide was published in April 2012 and included 11 pages of Hong Kong bond market statistics, including historical data such as bond holdings, bondholder distribution, outstanding amounts, and trading volumes. Not surprisingly, this data became stale soon after publication.

Since the ASEAN+3 Bond Market Guide is most likely to be updated only on a bi-annual basis, it is not the best channel for the dissemination of market statistics. Hence, a chapter comprising bond market statistics has been discontinued and replaced with a list of recommended sources for detailed, accurate, and current information sources on the Hong Kong bond market. These sources are listed below in alphabetical order.

- *AsianBondsOnline (an ASEAN+3 initiative lead by ADB)*
<http://www.asianbondsonline.adb.org/hongkong.php>
 - Market-at-a-Glance
 - Data (market size, yields, indicators, ratings, including historical data)
