

HYBRID EVENT

# 45th ASEAN+3 Bond Market Forum (ABMF) Meeting and Other Events

2 - 4 February 2026 | Yogyakarta, Indonesia

The event is co-organized by the Indonesia Financial Services Authority (OJK) and the Asian Development Bank (ADB).

**ASEAN+3 Bond Market Forum (ABMF)** was established in May 2010 by the finance ministers of the Association of Southeast Asian Nations (ASEAN) plus the People's Republic of China, Japan, and the Republic of Korea—collectively known as ASEAN+3—under the Asian Bond Markets Initiative (ABMI). The Forum is the only regional platform on which actions and recommendations are reported to the ASEAN+3 policy discussion. It functions to integrate the ASEAN+3 markets through standardization and harmonization of regulations and market practices as well as market infrastructures relating to cross-border bond transactions.

ABMF meetings are held three times a year, bringing together more than 100 experts from the ministries of finance, central banks, securities market regulators, central securities depositories, securities exchanges and market operators, financial market associations as well as major financial institutions and IT vendors in the region. The forum is open to experts who are interested in financial market developments and regional financial cooperation.

The **Indonesia Financial Services Authority/Otoritas Jasa Keuangan (OJK)** is an Indonesian government agency that regulates and supervises the financial services sector. Its head office is in Jakarta.

**The Cross-Border Settlement Infrastructure Forum (CSIF)** was established in 2013. The members of CSIF are composed of the central banks and central securities depositories of the ASEAN+3 economies. Officials from the ministries of finance and securities and exchange commissions of ASEAN+3 may join as observers.

The **Digital Bond Market Forum (DBMF)** was proposed by KMOEF as a collaborative platform where stakeholders can conduct research, share knowledge and experiences, and develop business models for regional adoption. DBMF will first focus on legal issues related to digital assets and digital bonds to establish a common understanding of how to approach new financial products. Then, it will discuss a possible business case. As stated in the ABMI Medium-term Road Map 2023-2026, “promoting digital transformation to integrate the ASEAN+3 financial markets” is considered one of the pillars of the roadmap. Therefore, DBMF and CSIF will collaborate closely to achieve tangible results through regional discussions. Basically, DBMF will focus on digital assets while CSIF will focus on actual business cases to promote cross-border transactions, especially government bonds, and to realize the linkages between the central banks and central securities depositories in ASEAN+3.
