Viet Nam

Yield Movements

Local currency (LCY) government bond yields in Viet Nam mostly rose between 1 March and 15 May (Figure 1). Yields climbed the most for 1-year through 3-year bonds, rising an average of 33 basis points (bps). Yields also gained for the 5-year and 7-year tenors, inching up 16 bps and 1 bp, respectively. In contrast, yields fell for both the 10-year and 15-year maturities, shedding 11 bps and 41 bps, respectively. As a result, the spread between the 2-year and 10-year tenors declined from 175 bps on 1 March to 125 bps on 15 May.

Elevated inflation levels since October 2016 have led to a rise in yields for most maturities. Consumer price inflation steadily climbed, hitting a high of 5.2% year-on-year (y-o-y) in January. However, more recent data indicated that inflation is starting to decline, easing to 3.2% y-o-y in May. The uptick in yields from the short-end through the belly of the curve is reflective of tightened liquidity conditions during and after the Tet holidays. Some banks were also reported to have raised deposit interest rates.

To help stabilize interest rates, the State Bank of Vietnam (SBV) has been injecting liquidity into the banking system through open market operations. Falling yields at the long-end of the curve are partly caused by increased demand among banks for longer-tenor government securities.

In the first quarter (Q1) of 2017, real gross domestic product growth in Viet Nam eased to 5.1% y-o-y after rising 5.5% in full-year 2016. The agriculture sector grew 2.0% y-o-y in Q1 2017, while the industry and construction sector grew 4.2% y-o-y. The services sector grew 6.5% y-o-y in Q1 2017, the highest growth rate among Viet Nam’s various sectors. Within the services sector, the largest gains came from the finance and insurance subsector, which rose 7.8% y-o-y.

Size and Composition

The size of Viet Nam’s LCY bond market reached VND998.6 trillion (USD44 billion) at the end of March (Table 1). Its bonds outstanding are the smallest among all emerging East Asian economies. Growth during the review period was largely driven by government bonds, particularly Treasury bonds issued by the State Treasury.

**Government Bonds.** At the end of March, the government bond market in Vietnam stood at a size of USD952.6 trillion, higher by 0.3% quarter-on-quarter (q-o-q) and 13.4% y-o-y. Growth came mainly from Treasury bonds, which climbed 1.5% q-o-q and 18.9% y-o-y. The stock of SBV bills all matured during the quarter in review as the central bank only issued bills with very short tenors that also matured in Q1 2017. The stock of state-owned enterprise bonds and other bonds marginally declined in Q1 2017.

The volume of new government debt issuance fell 56.5% q-o-q in Q1 2017, due largely to a decline in central bank issuance. On the other hand, new issues of Treasury and other government bonds rose more than twofold during the quarter. The government has reduced its issuance plan for 2017 to VND183.3 trillion from an earlier estimate of VND250 trillion. The government’s issuance plan is geared toward longer tenors as it aims to extend the maturity structure and ease payment obligations.

**Corporate Bonds.** At the end of March, the size of the corporate bond market was unchanged from the end of December at VND46 trillion. Growth was higher on a y-o-y basis, however, at 25.0%. The corporate bond segment of Vietnam comprises a total of 27 corporate firms and represents a 4.6% share of the total LCY bond stock (Table 2). (AsianBondsOnline classifies some state-
owned entities as part of the government bond segment.) The largest corporate bond issuer is Masan Consumer Holdings with outstanding bonds amounting to VND11.1 trillion. Its issuances accounted for a 24.1% share of the aggregate corporate bond market at the end of March. In the second spot was real estate firm Vingroup JSC with bonds valued at VND8.0 trillion. Completing the top three largest issuers was Asia Commercial Joint Stock with outstanding bonds valued at VND4.6 trillion.

Ratings Update

In April, Standard & Poor’s (S&P) Global Ratings affirmed Viet Nam’s BB– long-term and B short-term credit ratings. The outlook on both ratings was stable.

Policy, Institutional, and Regulatory Developments

State Treasury to Issue VND66 Trillion of Government Bonds in the Second Quarter of 2017

In April, the State Treasury released its bond issuance plan for the second quarter of 2017 amounting to VND66 trillion. Of this total, 45% will comprise bonds with maturities of 5–7 years, 27.3% will comprise bonds carrying maturities of 10–15 years, and 27.3% will comprise bonds carrying maturities of 20–30 years.

Ministry of Finance Issues Regulations on the Buyback of Government Bonds

Effective 1 May, the Government of Viet Nam can conduct buybacks and repurchases of government bonds. Eligible bonds for repurchase are those issued by the State Treasury. Bond repurchases by the government are conducted to help better manage its liabilities and establish benchmark interest rates. Buyback transactions will be undertaken in the Hanoi Stock Exchange (HNX) through negotiated sale or bidding process. The Ministry of Finance will provide the interest rate range for bond buybacks. This new regulation is expected to boost liquidity and maintain stability in the bond market.

Ministry of Finance Issues Regulations on Short-Selling and Sell–Buyback of Government Bonds

The Ministry of Finance issued a new regulation that will take effect on 1 September, allowing short-selling and repurchase transactions among member participants of HNX. The short-selling term will only be allowed up to a maximum of 180 days and must not exceed the remaining maturity of the bonds. Both HNX and Viet Nam Securities Depository also released rules governing short-selling and sell–buyback of bonds to help deepen the derivatives market in Viet Nam.
